General Instructions:	NAADCO SPRAY GRADE AMMONIUM SULPHATE 980 HERBICIDE ADJUVANT should be used with non-selective herbicides only, as with some selective herbicides use may result in loss of selectivity and therefore crop damage. Ammonium Sulphate may be

	<p>corrosive to metal parts of the sprayer. Thoroughly flush tanks, pumps and nozzles with water after use.</p> <p>NAADCO SPRAY GRADE AMMONIUM SULPHATE 980 HERBICIDE ADJUVANT is a completely soluble product. However, in circumstances of high humidity this product may 'cake' when exposed to the air. Potential problems may include handling problems after the product is opened, storage problems, and problems with dissolution or blockage of spray nozzles in boom sprayer/equipment. To reduce the potential for caking, any opened, unused product should be immediately closed to limit exposure to the air. In the event that the product has caked, ensure the product is fully dissolved before spraying to avoid the potential for nozzle blockage. Dissolving the product through the top screen of the spray tank and ensuring the product is completely dissolved before spraying commences will eliminate the potential for nozzle blockage due to caked material.</p>
